

Indiana State Department of Health

INDIANA CERTIFIED RADON LABORATORIES (As of 04/23/05)

You may buy detectors (radon test kits) from any of these laboratories to test your own home or building for radon. However, if you are testing residential structures and charging for your services, you will need to be state certified to use these detectors. These labs are listed in the Indiana Certified Radon Testers and Mitigators List as Radon Laboratory Testers.

< These labs sell long-term detectors, which are placed in the home for 91 days to 1 year.

Most of these labs sell short-term detectors, which are placed in the home for a minimum of 2 days (48 hours) to 90 days. The instructions, which should be included with the detector, will tell you the amount of time to leave the detector in your home.
